

## FBT Corporate Rail

The business travel portal for rail bookings

We have created the online platform FBT Corporate Rail so that you can book, change or cancel your rail travel at any time in accordance with your needs as a business traveller. The platform provides you with the option of using the functions in the same way that you would use the rail company's home page. It is user-friendly and intuitive.

## All from one hand

Certainly we are still personally available for you. For an even faster way to book from the road, outside the opening hours of your travel agency or directly from the company, we offer our existing customers the options of using the FBT Corporate Rail portal. You can specify whether you would like an online ticket or you would like to pick up your ticket at a machine at the rail station. We offer flexibility in all areas!

You can specify individuals (travel arrangers) who can make online bookings for you. For larger travel groups, simply transfer the booking via email to your travel agency. All information known to the system will be automatically passed on.

### Advantages of booking via the FBT Corporate Rail portal

- Access to existing bookings at any time
- Online booking for up to five colleagues simultaneously
- Consideration of your personal travel preferences including seat preferences, corporate credit cards, additional data fields and identification
- Inclusion of your key customer discount
- Hassle-free changes or cancellations
- Bookings are included in your FIRST Business Travel reporting function
