

## A3M

### Solutions for your travel safety

Our early warning, information and communication systems help you feel better while on journey. We deliver fast information in the event of global security threats and natural disasters, and thereby provide security during your travels.

# Professional and effective crisis management

The A3M Global Monitoring System supports you extensively in fulfilling your duty of information and care towards employees and customers. In extreme situations, which can impact your itinerary at short notice, we will keep you up to date with current information.

Our Global Monitoring System identifies and analyses critical events around the world and displays them via a web-based geo-information system. This way, potential dangers and behavioural measures can be communicated quickly. Our SMS assist service will help inform you quickly and directly about unexpected events, such as restrictions in air travel, strikes, natural disasters and political crises.

## Our main services at a glance

- Current travel alerts via our 24/7 monitoring system
